

Powder Pillows

Easy Tear

5 years shelf life

Field or lab use
 Easy open package, no calibration
 Required for Policontrol/Hach
 instruments

Measurement of chlorine levels in alkaline cleaners, sanitizer applications, food industry, drinking water treatment, and wastewater treatment.

Instrument required: Visual/Digital colorimeters or spectrophotometers

Powder pillows combine easy dosing with photometric precision. Ideal for pool or drinking water analysis. They can be used in Policontrol or HACH photometers without calibration.

100 or 1000 tests packages.

Parameter	Free Chlorine	Total Chlorine	Iron
Description	Powder Pillow		
Printed information	Code, Expiration Date, Parameter		
Operation	Ready to use		
Sample volume	10 ml / 5 ml		
Method	DPD		1, 10 phenanthroline
Packing	100 or 1000 tests		
Shelf life	5 years		
Storage	10 °C to 25 °C		
Direct Compatibility	Policontrol or Hach Instruments (no calibration required)
