

WaterWorks™ Peroxide Check Low Range

Detects: 0.05, 0.3, 0.5, 1.0, 2.0, 4.0 ppm (mg/L)

Bottle of 50 Tests

This simple colour test strip, from our WaterWorks™ brand, allows quick and accurate testing for Hydrogen Peroxide (H₂O₂) in water at a low range.

It is a simple dip and read test strip with a precise colour chart on the back of the bottle and the results are shown within 30 seconds. This test is very useful for the food processing industries and detecting very low levels of Peroxide or making sure all Peroxide is gone.

This test strip is simple and requires no other reagents or accessories. We use trace amounts of chemicals on our strips which makes them extremely safe and non-hazardous. They are considered as Articles under OSHA and do not require SDS sheets.
