

## Woda-Pure Clear Magnesium Mineralized

Removal of chlorine and other harmful substances present in water by means of activated carbon. Patented Magnesium mineralization technology replaces calcium present with essential magnesium by ion exchange, neutralising the pH and enhancing the flavour of your water. Perfect for hot beverages.

### Cartridge Size:

- V – 2,500L Capacity
- M – 3,800L Capacity
- XL – 6,100L Capacity

### Description

Under Counter Technology (Clean Drinking Water Direct from your Tap)

- Removal of particles such as sand, grit and rust
- Safe Removal of suspended solids
- Removal of calcium/Limescale
- Eliminates chlorine taste and smell
- Reliable removal of organic contaminants
- Best Flavoured tea and very aromatic coffee
- ADDS healthy magnesium minerals back into the water

### Additional information

<b>WATER QUALITY</b>	Improve Taste, Remove Colour & Odour, Remove Sediments
<b>HEALTH CONCERNS</b>	Add Magnesium, Improve Alkaline Levels, Remove Metals
<b>WATER SOURCE</b>	Municipal

### Enrich drinking water with magnesium while reducing limescale

BWT Woda-Pure Magnesium Clear Mineralizer reduces limescale in water and enrich with quality mineral magnesium, which improves the taste of food and aroma of drinks.

The release of Magnesium ions are beneficial to human health, providing the necessary nutrition for our body needs:

- prevents heart attack

1

- prevents fatigue, muscle cramps
- important for nerve system (aid in relieving anxiety, improves sleep quality)
- supports our immune system
- improves mental performance, enabling us to concentrate better on daily tasks
- improve taste of water

Woda-Pure Clear Mineralizer includes filter, filter head and accessories for installation. Stainless steel faucet and flow meter are add-ons.

**MADE IN GERMANY**

**With multiple levels of filtration, it is the ideal solution for individual needs:**

- Fine sediment filtration
- Reduces water hardness in water while replacing with magnesium
- Limescale formation in kettles and coffee machines will reduce significantly
- Ion-exchanger removes copper & other heavy metals
- Activated Carbon removes chlorine, pesticides, insecticides, sediments & other contaminants.
- Activated Carbon is coated with silver, inhibiting bacteria growth
